TREBLES.

THREE OCTAVES AND THREE NOTES.
FORTY-EIGHT KEYS.

No. 3.	Mahogany dark finish, ivorine keys, steel reeds, five-fold bellows	Price	\$ 95
4.	Rosewood, round top keys, steel vibrators, bushed throughout, morocco five-fold bellows	"	125
5.	Rosewood, superior materials and finish, bushed throughout, spherical end silver keys, steel vibrators, giving pure tone and rapid articulation, morocco five-fold bellows	"	145
5a.	Ebony, superior materials and finish, spherical end silver keys, steel vibrators, morocco five-fold bellows	"	165
6.	Ebony, Raised Ends , very finest finish spherical end silver keys, best steel vibrators, giving the purest and best tone that can be produced, dark morocco six-fold bellows, the finest selected materials throughout	"	190

EXTENDED COMPASS.

Scale of No. 8.

FOUR
OCTAVES.

FIFTY-SIX
KEYS.

Scale of Nos.
7 and 11.

8.	Same materials and finish as No. 6, but with fifty-six keys	Price	\$215
8a.	Same materials and finish as No. 6, but with sixty keys to A	"	230

TENOR-TREBLES.

7b.	Ebony black ends, round top silver keys, steel vibrators, bushed throughout, morocco six-fold bellows, forty-eight keys, from Tenor C to F	"	155
7.	Same materials and finish as No. 7b, fifty-six keys, from Tenor C to C	"	200
11a.	Same materials and finish as No. 6, forty-eight keys, from Tenor C to F, six-fold bellows	"	210
11.	Same materials and finish as No. 6, fifty-six keys, from Tenor C to C, six-fold bellows	"	235
12.	Same materials and finish as No. 6, sixty-four keys, from Tenor C to G, six-fold bellows	"	275

Nickel-plated metal ends to No. 7b and 7, \$12 Extra Ditto, raised to Nos. 11a, 11 and 12, \$15 Extra

BARITONES.

THREE OCTAVES AND THREE NOTES. FORTY-EIGHT KEYS.
FROM G ON THE FIRST LINE IN THE BASS CLEF.

9a.	Rosewood, round top silver keys, bushed throughout, morocco six-fold bellows, steel vibrators, fine tone, rapid articulation	\$125
10.	Same materials and finish as No. 5, very mellow and organ-like tone, six-fold bellows	"	190
10a.	Same materials and finish as No. 6, extremely rich and pure in tone, six-fold bellows	"	210
10b.	Same materials and finish as No. 6, but with fifty-six keys, from G on the first line of the Bass Clef to fourth G above, six-fold bellows	"	235

Nickel-plated metal ends to Nos. 9a and 10, \$12 Extra Ditto, raised to Nos. 10a and 10b, \$15 Extra

The keyboard of the Baritone Concertina is similar to that of the Treble, but the sounds produced are one octave lower throughout.

Basses and Concertinas of any Compass made to Order.

\$20 Extra

Concertinas in No. 6 quality can be made in Amboyna Wood, with Gold-plated fittings at

Any Instrument can be fitted with SPECIAL COMPOSITION METAL REEDS for Damp and Tropical Climates, without extra charge.

Instrument and New Philharmonic (low pitch) A 440 vibrations, unless otherwise ordered.

A Case is given with each Instrument.

THE "ÆOLA." New Octagonal Model.

- 21a. Nickel-plated ends, superior materials and finish, silver keys, steel reeds, morocco five-fold bellows .. " 155
22. Best nickel-plated RAISED ENDS, spherical end silver keys, best steel vibrators, morocco six-fold bellows, keys and tops bushed, new improved action, short touch and rapid articulation. Powerful tone .. " 210
24. Same materials and finish as No. 22, but with fifty-six keys, G to G " 230

Warren's Complete Instructions for the Concertina is the best and easiest book to learn and teach from. **Price** \$2.50

THE "WHEATSTONE" CONCERTINA.

THE "WHEATSTONE" CONCERTINA was invented about the year 1827 by Sir Charles Wheatstone (the inventor of the Electric telegraph), and having been improved from time to time by Messrs. C. Wheatstone & Co., has now become one of the most perfect, durable, and cheapest of musical instruments.

The "Wheatstone" Concertina has a complete chromatic scale, and possesses qualities which have never hitherto been combined in a single musical instrument. It is equally adapted to the most expressive performance and the most rapid execution, whether confined to the succession of single notes, as most other instruments are, or in harmony of two, three or four parts. From the remarkable simplicity of its fingering, and the great facility with which its tones are produced and sustained, it is very easily learned. An instrument which can play the *two* complete parts of a difficult violin duet, with very little special study cannot be other than easy to acquire; and as it cannot be soured out of tune, the most perfect crescendos and diminuendos may be obtained without the large amount of practice which is requisite on other instruments. The fingering being the same on the Treble, Tenor, Baritone and Bass Concertinas, enables players to take any part in Trios, Quartets, Orchestral, or other concerted music, which would be impossible in the case of string or other wind instruments. For example, a Violin player cannot play Viola, 'Cello or Bass without knowledge of each instrument, whereas a Treble Concertina player can play the Tenor or Bass with equal facility. These comparisons apply also to the wind instruments, such as Flutes, Clarinets, Bassoons, Oboes, Piccolos, etc.

The Concertina, when played as *Obbligato* or any other form of accompaniment with the voice, produces a most charming effect; for the Concertina as an aid to the voice, cannot be equalled by any other instrument.

The performances of Madame Amy Rowbotham, Miss Edith Drake, Miss Eva Taylor, The Fayre Four, Messrs. Harry Morton, Charles Rutterford, J. Astley, Colin J. Campbell, Ernest Rutterford, C. & T. Campbell (N.Z.), G. Matusewitch (U.S.A.), the late Signor Guilio Regondi, Messrs. Richard Blagrove, John C. Ward, George Roe, and others, at many concerts during the past and present years, have frequently enabled the musical public to judge of the effects and capabilities of the Concertina. An inspection of the music published will show that, either for solos or accompaniments, it is equal, if not more effective than any other instrument in present use; whilst, in its peculiar effects, and particularly in those of its harmonies, it is unrivalled. The Concertina is capable of performing music written for the Violin, Flute, or any other Orchestral Instruments, besides which many pieces of the highest artistic merit have been expressly composed or arranged by Macfarren, Molique, Wallace, Silas, Regondi, Blagrove, and many others. The Concertina produces the same sound whichever way the Bellows is moved, the action of which becomes very similar to that of the bow of the Violin, Violoncello, etc.

The Concertina can take part in quartets, etc., and do its work—as previously suggested—without in any way interfering with the musical interest; in fact, greatly augmenting it. To still further illustrate its great powers of adaptability and sympathy, when used in an Orchestral or Band for the rendering of any special part, it lends itself entirely to that part, sinking its own individuality. For example, it would be absurd to give a Violin part to a Flute, or *vice-versa*, but the Concertina being assigned, say, a Flute or Violin part would render that part with all that instrument's characteristics.

Messrs. C. W. & Co., may here mention that *all* their Concertinas are tuned on the EQUAL TEMPERAMENT system, which is the only recognised method that is used for the pianoforte and all other instruments.

Steel vibrators were first introduced by Messrs. C. W. & Co., in the year 1862, for the use of Signor Guilio Regondi and Mr. Richard Blagrove, and have since then stood the severest tests.

All their Concertinas are accurately tuned to the standard pitch, so that sets can be brought together without any trouble to the players. They can also be tuned to any other pitch to suit special requirements. All Messrs. C. W. & Co.'s Concertinas are *double action* and all the instruments are made entirely upon their own premises under personal supervision.

THE "ÆOLA."

THIS charming little instrument, now attracting such favourable notice in the musical world, has been placed before the public by Messrs. C. WHEATSTONE & Co. (the inventors and sole makers) for several years past.

It is universally admitted to be the finest toned musical instrument of the present day, possessing as it does, in so large a degree, the grand qualities of the tone proper to a Stradivarius violin, together with a marked resemblance to the human voice.

The recent performances of Madame Amy Rowbotham, Miss Edith Drake, The Fayre Four, Mr. John C. Ward, Mr. Richard Blagrove, Mr. Charles Rutterford, Mr. G. Matusewitch, Mr. Ernest Rutterford and other leading Professors have demonstrated the capabilities of the *Æola* to be far in advance of those of any other portable instrument, and have conclusively proved that whilst it possesses an individuality of tone that is inimitable, it is thoroughly capable of producing and sustaining most of the effects peculiar to stringed instruments, as well as other effects that cannot be produced save by a combination of two or more instruments of other kinds, or by the organ.

The solos and concerted pieces of the great masters written for the violin, Flute, etc., can be rendered upon the *Æola* with greater effect and precision than is ordinarily possible upon their proper instruments, whilst as the keyboard of the *Æola* is identical with that of Wheatstone's English Concertina, the whole of the important repertoire of the latter is of course available to the player.

The resonant character, and the extreme mellowness and purity of the tone of the *Æola*, together with its delicate and expressive touch, combine to recommend the instrument at once to the musical connoisseur as a really sympathetic and legitimate member of the wind instrument family, and one calculated to well repay the trouble of taking up; more especially as at the outset it presents to the student incomparably fewer difficulties to overcome than does any other kind of instrument that can be named. For so simple is the arrangement of the keyboard, and so easy the fingering, that with but slight knowledge of music a beginner who can devote no more than say half-an-hour a day, may become able to perform fairly well on the *Æola* in the course of a few weeks—an achievement utterly impossible with the Violin, Flute, etc.

The *Æola* is also invaluable to vocal students when practising, as well as for the rendering by themselves *obbligato* accompaniments to their own performance of songs, a feature in which the instrument is unapproachable save by Wheatstone's Concertina.

The *Æola* is made with a compass either of three and a half, four, or four and a quarter octaves, and only in one quality, namely, the very best. All *Æolas* are fitted with Messrs. C. W. & Co.'s latest (Concertina and *Æola*) improvements, including their perfected duplex screwed notes, spherical keys, and new steel reeds. They are tuned to any pitch required, and with ordinary care remain in tune many years.
